

Sudden Unexpected Child Death

(Rapid Response Protocol)

LSCB - “Practice Points” Learning Scenarios

To be discussed in Team/Group Sessions – 15 minute discussion

The LSCB Learning & Development subcommittee invite you, in team meetings or during group supervision, up to four times a year to discuss a child safeguarding issue. We encourage responses to be included in your team minutes and forwarded to the safeguarding lead within your organisation.

We hope that this is a way in which frontline staff across the city can explore some areas of learning without the need to attend formal training. It should also highlight areas of further learning.

We are happy to provide assistance with access to relevant learning materials

Consider the following question, and discuss.....

On arrival at work, you are informed that there has been an unexpected death of a very young child overnight. There are school aged children in the family, and the Police are asking for assistance.

What would or should you be doing to assist this in this situation?

Points for discussion:

How would you progress this matter?

What further information would you like from the school or children?

Would you advise the family of your concerns?

How would you assess this risk?

Do you require any further information from other agencies and how might you obtain this?

What is your role in this situation?

If you are leading this discussion here is information for you to investigate to assist with the discussion:
